ProXpert

A FFA Tool - Digitise your operations for better visibility, insights, and intelligent remediation

proxpert.co.in

optimus.net.i

retroev.in

CAPABILITIES

- **Workforce Management** - Salary with salary cycle and salary slips, Mobile Selfie and geofenced Attendance, Access mgt and leave management , Hiring pipeline with auto job posting on website
- **Facility Management** -Property Management, inventory , Enquiry, Contract, Onboarding , car pass,Rentals and billing
- **Maintenance Management** : Preventive and corrective Maintenance , geofencing, defect report , work order, mobile , ticketing
- **Asset Management** - Inventory Management , issue , receipt

- **Mobile Attendance (App-based)** - Check-in/check-out from mobile app with GPS location. Camera capture at the time of marking attendance. Offline attendance syncing when internet is unavailable
- **Geo-Fencing & Location Rules** - Restrict attendance marking to specific office zones or client sites. GPS boundary control for remote workers.
- **Real-Time Dashboard** - Live attendance data by location. Absent, late-in, early-out, and on-duty status overview. Team availability summary.
- **Reporting & Analytics** - Daily/weekly/monthly attendance reports. Absentee trend analysis. Attendance vs. productivity reports

- **Dynamic Question** - Dynamic The Dynamic Question Builder empowers administrators and form creators to easily build intelligent, rule-based forms that adapt in real-time to user responses. With an intuitive drag-and-drop interface and advanced logic controls, this feature streamlines the creation of personalized, interactive questionnaires—no technical skills required.
- **Procurement / Purchase management** - Procurement process under various financial power, purchase officer , purchase committee , Purchase order, Billing, expense Management.
- **Sales CRM** - Dynamic The Dynamic Question Builder empowers administrators and form creators to easily build intelligent, rule-based forms that adapt in real-time to user responses. With an intuitive drag-and-drop interface and advanced logic controls, this feature streamlines the creation of personalized, interactive questionnaires—no technical skills required.

CAPABILITIES

- **Account Management**
- **Helpdesk Management**
- **Scalable across various zones**
- **Workflow and document mgt**
- **Mobile apps and backend web console**
- **Mail, Mobile, SMS and Whatsapp notifications**
- **Payment gateway integration for payments**
- **Mobile responsive websites**
- **Security patches with vulnerabilities**
- **2FA with mail , SMS and whatsapp based OTP**
- **HOSTING servers with linux and Windows server OS**
- **API and webhooks for integration with legacy system**

Our application solution being proposed for Indus Telecom tower has the undermentioned capabilities which are visualized as an essential requirement to improve field force tracking and monitoring. The features offered by the proposed solution include:

- a) **Real-time Location Tracking** :GPS-based tracking of field technicians allows for real-time monitoring of their location. Geo-fencing to ensure that workers are operating within designated areas. Route optimization for efficient travel between tower sites.
- b) **Task Management**: Automated Job status updates to monitor the progress of each task (e.g., initiated, in progress, completed).Prioritization of emergency maintenance tasks over routine inspections.
- c) **Workforce Productivity Analytics**: Performance tracking of individual technicians based on the number of jobs completed, average time per task, etc. Attendance and time tracking for field workers, ensuring efficient use of time.Generate reports and analytics to measure overall workforce efficiency and identify areas for improvement.
- d) **Mobile Access and Offline Capability**: Allow field technicians to access the platform via mobile devices and perform tasks such as job updates and reporting. Offline functionality to capture data even in areas with limited network connectivity, which is then synced once back online.

Integration with Other Systems

- e) **Integration with enterprise systems** such as ERP, CRM, or inventory management software.Data sharing with network monitoring systems to receive alerts or performance data for immediate action.

- a) **Workforce Productivity Reports:** The field force software for a telecom tower company can generate a wide variety of reports to provide insights into operations, workforce productivity, asset management, and tower performance. These reports can help management optimize operations, improve efficiency, and ensure compliance with service level agreements (SLAs) and safety regulations.
- i) **Technician Performance Report:** Provide data on jobs completed by each technician and average task duration.
 - ii) **Task Completion Report:** Overview of all tasks assigned, in-progress, and completed during a specific time period.
 - iii) **Attendance and Work Hours Report:** Tracks hours worked by technicians, including start and stop times, breaks, overtime, idle time etc.
 - iv) **Daily/Weekly Job Summary:** A summary of tasks completed by the team/individual, including the nature of the job (e.g., repair, installation, inspection), and location.
 - v) **Job Status Report:** Displays the status of all active tasks, categorized as completed, in-progress, pending, or delayed.
 - vi) **Job Priority Report:** Breaks down tasks by their urgency (e.g., emergency maintenance, routine inspections) and their completion status.
 - vii) **Job Turnaround Time Report:** Provides insights into the time taken to complete tasks from the moment they were assigned to the field technician.
 - viii) **Route and Travel Optimization Reports**
 - **Route Efficiency Report:** Analyzes the routes taken by field technicians to and from tower sites, suggesting ways to reduce travel time and fuel consumption.
 - **Travel Time Report:** Displays the total time spent by technicians on the road and provides insights into travel efficiency.
 - **Fuel Consumption Report:** Tracks the fuel consumption of vehicles and equipment used by field teams as per defined parameters.

Sales CRM: A Sales CRM (Customer Relationship Management) system is designed to help sales teams manage their leads, nurture customer relationships, and close deals more efficiently. Below are the core features that power high-performing sales operations.

- i) **Lead Management:** Track and manage potential customers from first contact to conversion.
Capture leads from forms, emails, social media, or integrations
Assign leads to sales reps based on rules or location
Tag and prioritize leads by engagement and score
- ii) **Sales Pipeline Management:** Visualize and control your entire sales process from opportunity to closure.
Drag-and-drop pipeline stages
Set goals and stage-wise targets
Monitor deal progress and bottlenecks
- iii) **Contact & Account Management:** Maintain a 360° view of customers and accounts.
Store contact details, communication history, documents, and notes
Link contacts to companies/accounts
Track relationship milestones and decision-makers
- iv) **Task & Activity Management:** Keep sales reps organized and proactive.
Create, assign, and schedule tasks
Set deadlines and priorities
Get alerts for overdue or critical actions.

Custom Reports: Management may want to generate specific reports based on unique business needs, combining data points from task assignments, equipment health, workforce performance, and financials. These reports can typically be customized or filtered by specific time periods, locations, technicians, or equipment to provide actionable insights for improving operations and efficiency.

Preventive Maintenance

Webconsole - Question Builder

- Operational team can prepare inspection questionnaire with different questions and answer types from web console
- Publish to field agent mobile handsets

- Once Questionnaire is prepared, it can be published to all the mobile handsets of field officers over the air, at once and immediately
- Field Officer can open the Inspection questionnaire on their mobile handsets and carryout the inspection
- Every location is geofenced hence the field officer cannot attempt false inspection
- On successful submission of inspection report from the mobile handset, the operational team can view the inspection report and all issues can be converted into tickets and assigned back to field agents for resolution
